

BURN MANAGEMENT

This online independent study module is approved by the California, Florida & District of Columbia Nursing Boards. This online training module has been developed to provide the most current recommendation and guidelines on Burn Management in clinical settings.

Upon completion of this course, you will be able to learn:

- Structure of the skin
- Pathophysiology of the burn and methods of physiological monitoring
- Define the magnitude and severity of an injury
- Determine the appropriate guidelines for transfer of a patient, including factors of time, facility and method of transport
- Provide primary treatment of the burn area, associated injuries and common complications within the first 24 hours post-burn.
- Burn wound management
