

## DESQUAMATIVE GINGIVITIS (DG)

This course is designed for dental healthcare professionals to provide most current information on etiologies, treatments and recommendations for the patient who exhibits the characteristics of desquamative gingivitis (DG). Patient management is discussed in four separate phases: diagnosis, control, consolidation and maintenance. Relevant histological and direct immunofluorescence examinations are discussed and suggested biopsy techniques for optimal results are explained.

### Upon completion of this course, you will be able to learn:

- The definition of gingivitis and desquamative gingivitis (DG)
- The risk factors associated with gingivitis
- The classification (Plaque-induced and Non Plaque-induced) of gingivitis
- The mucocutaneous conditions associated with desquamative gingivitis
- Diagnosis, testing, interventions and management of desquamative gingivitis
- **Patient education and preventive measures**
