

# INFECTION CONTROL & STANDARD PRECAUTIONS

This online independent study module is approved by the Florida Board of Nursing, Florida Board of Dentistry, California Board of Nursing, and District of Columbia Nursing Board. This online training module has been developed to provide the most current information on infection control and standard precautions practices and principles in healthcare settings to minimize the transmission of healthcare associated infections.

## Upon completion of this course, you will be able to:

- Discuss requirements for infection control training.
- Spell out professional responsibilities for monitoring infection control practices and interventions for compliance and safety.
- Explain the chain of infection and describe the way infection control concepts are applied.
- Define engineering controls, work practice controls, and environmental controls and give examples.
- Identify barriers and personal protective equipment (PPE) for protection from exposure to potentially infectious material.
- Explain the importance of reprocessing methods (cleaning, disinfection, and sterilization) to ensure the safety and integrity of patient-care equipment.
- Identify occupational health strategies for preventing the transmission of blood borne pathogens and other communicable diseases through healthcare workers.

## Contact Hours : 3 Hours
