

PREVENTION AND TREATMENT OF PERIODONTAL DISEASE

This course is intended to provide the dental healthcare professionals with an overview of prevention and treatment of periodontal disease. Topics discussed include the risk factors and etiology of periodontal disease, non-surgical periodontal therapy, adjunctive therapies and the role of the dental team in prevention and treatment.

Upon completion of this course, you will be able to learn:

- The prevalence of periodontal disease in the United States.
- The pathogenesis of periodontal disease.
- The risk factors and etiology of periodontal disease.
- The identification of patients at greater risk for periodontal disease.
- The classification of periodontal disease.
- The systemic impact and medical consequences of periodontal disease.
- The periodontal screening tools used in periodontal examination.
- The surgical and non-surgical treatment of periodontal disease.
- The preventive measures and patient education of periodontal disease.
