

TERRORISM RESPONSE FOR HEALTHCARE PROFESSIONALS

This online independent study module is approved by the Nevada Board of Dental Examiners and by Nursing Boards (Florida, District of Columbia, and California). This online training module has been developed to provide the most current information from the Department of Health and Human Services, Centers for Disease Control and Prevention on biological, chemical, radioactive, or nuclear agents used in a terrorist act.

Upon completion of this course, you will be able to:

- Identify common acts of terrorism.
- Define weapons of mass destruction.
- Identify the appropriate personal protective equipment required for exposure or potential exposure to a weapon of mass destruction due to an act of terrorism.
- Identify common symptoms and methods of treatment associated with exposure to, or injuries caused by, chemical, biological, radioactive, and nuclear agents.
- Define Syndromic Surveillance and reporting procedures for acts of terrorism that involve biological agents.
- Identify several types of information available on the Health Alert Network.

Contact Hours : 4 Hours
