

DE QUERVAIN'S TENOSYNOVITIS

The purpose of this course is to review the current literature on deQuervain's tendonitis with emphasis on specific interventions using appropriate outcome measures. This course focuses on the prevalence, incidence, histopathology, causes, risk factors, diagnosis, evaluations and appropriate treatment / therapeutic interventions for patients with de Quervain's tenosynovitis.

Upon completion of this course, you will be able to learn:

- Define de Quervain's tenosynovitis, understand the prevalence, incidence, histopathology, causes and risk factors
- Identify the anatomy involved in de Quervain's tenosynovitis
- Identify common diagnostic tools used for de Quervain's tenosynovitis
- Identify other disorders to be ruled out as symptomology may be confused with de Quervain's.
- Identify appropriate outcome measures to be used when evaluating de Quervain's tenosynovitis
- Understand the importance of using a holistic approach when assessing, documenting and developing a treatment plan for de Quervain's tenosynovitis
- Identify appropriate treatment interventions in treatment of de Quervain's tenosynovitis

Author: Christine Church , M.S., OTR/L
