

Occupational Therapy in Pulmonary Rehabilitation

Course Outline/Table of Contents

Course Outline (Table of Content):

(240 minutes)

Introduction

Population at risk - key factor in the development and progression chronic respiratory diseases (5 minutes)

Chronic Respiratory Disease (Causes, Risk Factors, Pathophysiology and Clinical Presentation): (90 minutes)

- Chronic Obstructive Pulmonary Disease (COPD)
- Pneumonia
- Interstitial Lung Disease (ILD)
- Acute Respiratory Distress Syndrome (ARDS)

Common Respiratory Procedures / Tests (20 minutes)

Role Of Occupational Therapy In Pulmonary Rehabilitation (30 minutes)
Client-centered care while addressing respiratory disease in various settings

- Acute Care Hospitals
- Long-term Acute Care (LTAC)
- Inpatient Rehab and Skilled Nursing Facilities (SNF)
- Inpatient Rehab and Skilled Nursing Facilities (SNF)
- Outpatient Pulmonary Rehab

Occupational Therapy Process From Evaluation to Discharge (60 minutes)

- Evaluation Process - OT Evaluations and Screening Tools
- Intervention Process - OT Interventions and Education
- Discharge Planning

Case Study - COPD Exacerbation (Short-term Rehab Setting) (30 minutes)

Conclusion & References (5 minutes)
